

<p><b>BELLA SUN PEACOTUM</b> July 15 - 25 An interspecific apricot bred by Zaiger Genetics. Both apricot and plum flavors are well represented in a single fruit. Good flavor balance with sweet and plenty of tartness, and plum flavor. Outstanding.</p>
<p><b>CANDY HEART PLUERRY</b> August 15 - 25 Plum/Cherry cross. Dark red skin and speckled finish. Flesh is amber-red. Unique flavor.</p>
<p><b>CRIMSON ROYALE</b> August 5 - 15 'Crimson Royale' from Zaiger Genetics is the finest example of a pluot. It's plummy, but the apricot parentage is also well represented. Crimson, with orange flesh. Loads of juice. When fully ripe, it's sweet with an outstanding complex flavor.</p>
<p><b>DAPPLE SUPREME</b> July 5 - 15 One of the 'Dapple Series' of pluots created by Zaiger Genetics. Modeled skin, dark red flavorful flesh.</p>
<p><b>EBONY ROSE</b> July 20 - 30 Beautifully colored, dark red skin with matching flesh. Bold flavors. Excellent quality.</p>
<p><b>EMERALD GEM</b> July 20 - August 5 A newer pluot similar to 'Flavor Queen' with a little more balanced flavor. Chartreuse to golden in color. Sweet with complementary acid. An excellent light fleshed pluot from Zaiger Genetics.</p>
<p><b>FLAVOR BLAST PLUOT</b> Sept 15 - 25 A complex interspecific plum with very sweet flesh. Excellent eating quality. Ripens late.</p>
<p><b>FLAVOR FINALE</b> August 20 - September 5 An excellent late pluot from Zaiger Genetics. Purple skin with red-amber flesh that's juicy and flavorful. Best when ripened. An outstanding pluot selection.</p>
<p><b>FLAVOR GRENADE</b> August 5 - 20 A very large, very irregular in shape but mostly oblong, somewhat like a kiwi fruit. Often cosmetically challenged, its surface is usually lined with tiny rills with an occasional deeper crack or crevice. Even the color is something less than attractive; greenish, eventually turning chartreuse, with some purple mottling and reddish tints. However, we grow this one for its outstanding flavor and texture, not its looks. Very sweet with good acidity levels, crisp and juicy texture. When allowed to hang on the tree a few extra weeks it develops into a luscious fruit candy.</p>
<p><b>FLAVOR KING</b> July 20 - August 5 'Flavor King' is one of the most flavorful pluots. It's been described as having the flavor of the 'Santa Rosa' plum, but much richer, and it does not have a tart skin. Others will compare the taste to a very intense watermelon flavor. The flesh is a deep maroon color and very juicy. This pluot can be picked while still firm off the tree. Makes an</p>

<p>excellent sorbet. We have a recipe.</p>
<p><b>FLAVOR PUNCH PLUERRY</b> Sept 5 - 15 Small to medium size with a red exterior, and bright orange flesh. Excellent tropical punch flavor.</p>
<p><b>FLAVOR ROUGE PLUOT</b> June 15 - 25 Attractive red skin, and very sweet flavor. An outstanding early season selection.</p>
<p><b>FLAVOR SUPREME</b> July 10 - 20 'Flavor Supreme' is the earliest of the highly flavored pluots and ripens during 'Blenheim' apricot season. Resembles a typical blood plum in appearance, but has very little tartness at the skin. The dark red flesh is juicy, sweet, and richly flavored.</p>
<p><b>FLAVOR TOP</b> July 15 - 25 'Flavor Top' nectarine is one of the old standard commercial varieties but still impresses with its flavor. Yellow with a fair amount of blush. Sweet, tart, complex flavor and juicy texture.</p>
<p><b>HONEY PUNCH</b> August 5 - 15 An excellent introduction from Zaiger Genetics. A very late-ripening dark pluot, medium-sized fruit with red-streaked amber flesh of outstanding flavor and texture. One of the best late pluots.</p>
<p><b>SPLASH</b> July 10 - 25 Small mid-season pluot. Bright orange blush splashed over golden background. Firm but juicy flesh, pleasant, slightly acidic flavor.</p>
<p><b>SUGAR TWIST PLUERRY</b> June 20 - 30 Red skin and yellow flesh, has a sugary sweet flavor.</p>
<p><b>SUMMER DELIGHT APRIUM</b> August 5 - 15 The flavor is sweet and acidic, with an after-taste of 'Santa Rosa' plum. Crisp flesh. Ripens after most of the other apricots are gone.</p>
<p><b>SUNSET DELIGHT</b> Sept 15 - 25 A late-maturing pluot with mostly red over yellow skin color. Good sugar/acid balance.</p>
<p><b>SUPERIOR</b> July 20 - August 05 A hybrid plum consisting of several plum species. Developed in Minnesota for hardiness, but it's very productive in California and has excellent flavor. Tart skin.</p>
<p><b>SWEET TREAT PLUERRY</b> August 10 - 20 Top in flavor. Extremely sweet flavor.</p>
